linkedin: [www.linkedin.com/in/idosu](http://www.linkedin.com/in/idosu)

## Skill Highlights

- **Java:** main traits: reflection, generic reflection, java8 streams, java swing
- **Java libraries:** e.g. Spring framework, JPA(Hibernate), lombok(getters, setters and more), Gson (json), Log4j
- **Java unit tests:** JUnit4, Mockito
- **Java build and dependency resolution:** Ant+Ivy, Gradle
- **Shell scripting:** excelent in \*nix bash shell scripting and windows batch
- **CI/D:** Worked on CI/D processes using Jenkins and docker

## Work Experience

### 2010-2011 *developer*

Developed PHP sites alongside my father using no librarries, using server: php and mysql, client: Javascript, AJAX, HTML and CSS. Our sites worked good with google

### Nov 2012-Sep 2013 *Zahal programming course*

main topics: outdated Visual Basic, basic Assembler, C using C++ librarries but without using classes, C#, SQL(Oracle), Java

### Sep 2013-Jul 2015 *developer*

Wroked to fix a main project that had performance issues, also upgraded the Java standart librarly from 4 to 7, added tests, added Ant+Ivy for processes like JAXB compilation running tests and building the kit to be installed

### Jul 2015-Aug 2016 *senior developer & consultant*

Added CI+CD process for all the projects in our organization using jenkins, java, ant and alot of windows batch and linux bash scripts.

Aug 2016-Apr 2018 *senior developer & consultant*

Created a new framework using `spring boot`, `hibernate`, `jenkins`, `docker`. and developed an application using this framework, Because it was written after I engaged in CI/D we developped with `junit` and automatic builds when a commit was pushed.

## Education

Full Bagrut where the main points are: 10 in Computer science(using `C#`), 5 in math and 5 in english
